GT500.R

GT500.R

We have retained the classic boat tail design yet subtly added design touches to accentuate the overall look. These subtle mods include such things as the frenched bumpers and grill to eliminate body gaps. Underneath it all is a custom Full Frame chassis which gives the car its low stance and allows us to run those big 20" wheels (22" rear are an option as well). This Stance is the key design element that distinguishes the car from the pack. A crate LS3 mated to a 4L80 Auto Box gives more than adequate power and big Wilwood brakes do an awesome job at stopping all this mass at speed.
